BURLGARS AT CHINOOK

Mr. W. S. Lee's Hardware Store was broken into early Sunday morning. Oct. 6th, when burglars entered through the side door carefully turning the safe until they succeeded in getting it open, and made their escape with \$700.00 about 250.00 of this amount being cash with the balance in grain and other cheques. Up to the present time no trace of burglar has been found.

Wedding Bells

A quiet wedding was solom-nized Monday, September, 23 in St. John's manse when Miss Verna' eldest daughter of Mr and Mrs. Leonard Dressel, of Chinook, Alta, became the bride of Mr, Eldred Joseph Langevin, of Regina. The bride was charmingly clad in white organdie, her bouquet being of carnations and lilly of the valley.

She was attended by Mrs, Arthur Teel, Mr. Gordon Teel acting as best man for Mr, Langevin.

After the ceremony a delightful lunch was served at home of Mrs. Albert Hedlund.

Mr. and Mrs. Langevin each of whom has many friends in Medicine Hat, left later by motor for Moose Jaw and points east,

Winners

Wheat growers, as individuals, are helpless.

They require a strong and courageous organization to give aid when most needed.

The wheat Pools have been the consistant supporters of the growers' interests.

The Pools have reduced costs, narrowed spreads and shown the way for fair and equitable dealings.

The Pools have borne the brunt of the battle against ruinous price levels.

Change And Rest

During the past two or three weeks radio fans, no doubt, have become rather tired of listening to the pleas and plaints of the politicians who have been making the welkin ring with appeals for support for the candidates of their choice, with fulsome praise for the policies of their own party and thunderous denunciations of the fulminations, fallacies and falsehoods of their opponents.

It was not very long ago that the opportunity afforded the farmer in the country and the citizen of the small town or village to absorb political knowledge and information—and sometimes misinformation—was restricted to one or two meetings during the campaign in the little school house on the other side of the pasture field or in the hall over the hardware store.

It often meant that the country resident had an opportunity of hearing only one side of the political story. A heavy fall of snow, a deluge of rain, the necessity of remaining home to act as nurse to a sick cow or to entertain unexpected visitors—all these and many other things—intervened to make it impossible to attend a second meeting and hear what the opposition had to say.

All that has been changed now. The politician has discovered the radio and the ability it gives him to reach into the homes of the land and pour forth his message, wily, nifty, into the ears of willing and unwilling listeners alike. And he took advantage of this facility to the nth degree during the Federal election campaign. Never in the history of Western Canada has the radio been brought into requisition so extensively to preach the gospels of tariff, internal reform, social credit, currency changes and what not as the solution to the ills to which the country has been, is and will be, a prey.

If the country and small town voter in the past has had to make up his mind how to cast his ballot on a meagre diet of data and information and, as was said just now, sometimes misinformation, to-day this condition is entirely reversed, thanks to the radio. By this time the average voter, who has not deliberately "tuned out" too often, certainly cannot claim that he had no opportunity of studying the issues which have been presented "over the air" in great diversity and with much frequency.

It is quite possible, on the other hand, that he may have some ground for complaint that the diet has been too heavy, decidedly mixed, in fact, that he has been surfeited with so much information, partial information and misinformation that the issues, instead of being clarified became more and more confusing with succeeding broadcasts.

While the radio can be thanked for having done much to make available to the electors a great deal of knowledge, on the other hand as a disseminator of political platforms and policies and party propaganda it has some disadvantages.

One of the disadvantages is the tendency on the part of a considerable percentage of political radio lecturers to gabble their speeches at a speed comparable to the recent automobile record established by Sir Malcolm Campbell. To the listener at the receiving end it appears as though the speaker had back of his mind something like the following:

"I am paying, or the party is paying (as the case may be) a dollar a minute for this. I am only allotted ten minutes and for the love of Mike (short for microphone) I've got to jam as much across the air in that time as my breathing apparatus will permit and get the greatest possible value for the money."

As a result the gentleman on the receiving end is lucky if he is able to catch more than one sentence out of every three and to absorb more than one of every six.

The political marathoner appears to forget, too often, that what counts is what he is able to plant in a receptive mind at the other end and not the number of words that he can shout into the mike—poor Mike—in a given number of minutes.

The political expounder also seemingly too often forgets that he starts on his race with a serious handicap compared with the platform orator at a public gathering. The latter is able to point his remarks or to emphasize his periods with a shrug of the shoulder, a lift of the hands or a flash of the eye and these devices, used with discretion, help the speaker to impress his views on the listener.

To the radio speaker all these and other devices of gesture, and personality of appearance and mien, are denied and he must rely solely on inflection of voice, distinct articulation and pause, for effect, and if he does not make full use of these his message may be nearly a total loss.

After a few weeks of repetition of political dietary the average radio fan may well be pardoned if he heaves a sigh of relief as he twiddles the dials and finds seeping into his consciousness the pleasant strains of a first-class orchestra, the well modulated tones of the players in a radio drama or even the thump of the drums and skin of the bagpipes.

A change is as good as a rest.

Arctic Cruise

Discover Evidence of Early Migrations of Eskimo Tribes

Long sought for information about the early migrations of Eskimo tribes may be disclosed by material gathered by Douglas Leechman of the National Museum of Canada during the 14th annual Arctic cruise of the steamship *Nasopie*, which returned recently from the north. Mr. Leechman said he had excavated a ruined Eskimo village on Button Island, north of Fort Burwell. His work brought to light ruined huts, weapons, tools and utensils that may be linked with discoveries made in other sections of the great northland.

Open-air schools in London now accommodate 1627 pupils.

Palestine Is Progressing

But Men Newcomers Outnumber Women Two To One

Zionism in one way leads the world, for in Palestine there is no unemployment. There is work for all in the great program of building and of wasteland reclamation now in progress. Money from the outside continues to pour in, and adequate funds are available. But it has run into an unexpected difficulty. Among the newcomers the men outnumber the women two to one. It is the same experience so many lands have had. There is an alarming shortage of wives for the young men. That happened in the early days of Virginia, when it was necessary to send shiploads of marriageable girls to bring society to its proper equilibrium. History may repeat itself.—Cincinnati Enquirer.

Good Guernsey Record

The four-year-old Guernsey cow, Lark of Chilora, owned by Dr. W. E. Wesells, Milner, B.C., has just completed an outstanding production record of 11,435 lbs. of milk and 624 lbs. of butter fat on twice-a-day milking, in 365 days.

Only 11 of the recognized chemical elements were known when Columbus discovered America. 2119

Commission Of Agriculture

International Organization Holds General Assembly In Belgium

The International Commission of Agriculture which embraces the International Union of Agricultural Associations representing agriculture in all parts of the world held its general assembly at Brussels and Gemboux, Belgium, recently. The League of Nations, the International Labour Office, the International Institute of Agriculture, and the International Co-operative Alliance were represented, together with 110 delegates from various agricultural organizations in different parts of the world. The three principal questions before the Commission were the organization of agricultural production under planned economy, the edible fats problem, and the limitation of pig breeding and fattening, with reference to the special pig breeding attempts being made in Denmark and Holland.

The assembly devoted special attention to the present world condition of agriculture, arriving at the conclusion that in spite of the fact that useful measures had been taken in several countries since 1932, the condition of agriculture had not improved, in most countries. Therefore, the Commission adopted a declaration insisting upon the different requests of its Lausanne declaration and setting up new proposals. In effect, this means that the two main problems to be solved in order to overcome the agricultural crisis are those of wheat and edible fats. On the one hand, the Commission is convinced that the London Wheat Agreement (1933) ought to be prolonged and improved, while, on the other hand, as regards edible fats, the old civilized countries ought to take measures, or improve the existing measures, to prevent the consumption of tropical fats and whale oil where they handicap the normal consumption of butter and lard. The Commission's declaration also lays stress upon the necessity of improving the prices of agricultural products and of reducing the cost of production as well as increasing consumption. The next assembly of the Commission will take place in Oslo, Norway, in 1936.

Wheat Shortage

United States Will Have To Buy Considerable Quantity From Canada

The world wheat surplus this year will be the smallest in 13 years, the United States department of agriculture estimated recently. The wheat supply will be about 330,000,000 bushels less than in 1934-35, due to short crops in Argentina, Australia and the United States.

Department officials agreed considerable amounts of high grade wheat to mix with the United States supply would have to be imported during the coming year from Canada. With almost two-thirds of the world carryover in the Dominion, its wheat holdings will "dominate world markets," the department said.

The world wheat production was estimated at about 3,430,000,000 bushels and the world carryover, outside of Russia, at 800,000,000 bushels, or a total of about 4,230,000,000 bushels. Production last year was 3,459,000,000 bushels and carryover 1,100,000,000 bushels, or a total of about 4,559,000,000 bushels.

The short crops this year will reduce world carryover by the end of this season to between 400,000,000 and 500,000,000 bushels, or not much more than normal world carryover prior to 1928.

Epidemic Of Measles

Disease Spreads Among Indians From Yukon To Fort Chipewyan

Starting in the Yukon last spring, a severe epidemic of measles has spread up the Mackenzie river basin and now has reached as far south as Fort Chipewyan, causing hardship but few deaths among the Indian tribes scattered throughout the area, according to R. H. G. Bonnycaise, manager of the western Arctic division, Hudson's Bay Company, who arrived after a summer in the far north.

A New Experiment

Dr. S. S. Brukhonenko, who has been experimenting in the revivification of animals, announced that a new state scientific institute is being organized at Moscow for experimental work looking toward the revival of human beings, after "incomplete death." He explained "incomplete death" is death such as from accidents where the vital organs remain intact.

The five Canadian manufacturing companies specializing in lawn mowers produced 24,469 machines in 1934.

Striving To Reach Goal

Scientists Hope To Bombard Stratosphere With Speedy Rockets

Col. Charles A. Lindbergh, who mixes science with aviation, and Harry F. Guggenheim, the financier, gave the outside world a hint of the importance of ethereal experiments which may send rockets streaking into the stratosphere at super-speeds. It was reported authoritatively by Dr. Robert H. Goddard brought Guggenheim's announcement that the Guggenheim Family Foundation would pour more funds into the enterprise.

The "important" problem of automatic stabilization of rockets in vertical flight already has been solved, it was reported authoritatively and projectiles have been fired in preliminary work at speeds approximately 700 miles an hour.

Dr. Goddard explained the success of numerous tests in which vertical flight of the rocket had been maintained by a gyroscope.

Renewed aid of the Foundation assured Dr. Goddard that now he may set out upon his prime objective; to send the rockets, propelled by liquid oxygen and gasoline into the outer space with recording instruments for atmospheric data of significant value to aviation and meteorology.

From a sixty-foot tower Dr. Goddard would shoot his twelve-foot rockets to altitudes greatly exceeding those which balloons are able to reach.

With his rockets he hopes to pierce the stratosphere in regions more than 30 miles high, so imperative to science, where electrical phenomena including ionization and the reflection of radio waves occurs.

Astronomical photography without the interference of the earth's atmosphere would be another prized objective.

Proved Their Efficiency

Emperor Selsie Decorated Three Guards For Arresting Him

Emperor Haile Selsie was arrested by three of his palace guards in succession and the three were decorated. The Emperor is in the habit of donning peasant costume and making surprise inspections of Addis Ababa at night. He returned to the palace after curfew and found three of the imperial gates barred. At each gate he was arrested by the sentry on duty and released only when a sergeant was called out.

FASHION FANCIES

SMART AND ENGLISH LOOKING SCHOOL DRESS WITH PLAITS AND BUTTONS NECK TO HEM

By Ellen Worth

Plaits are used with delightful effect down the front of this school-girl's dress. Not only do they trim but also afford the necessary fulness to this model.

A plaided woolen in scarlet and blue with plain scarlet woolen trim made this cunning dress. The bone buttons repeated the red tone. A cotton print in Duoblen-red ground is another new and smart scheme for its development.

Style No. 690 is designed for sizes 6, 8, 10 and 12 years. Size 8 requires 2 yards of 39-inch material with 1/2 yard of 39-inch contrasting. Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course one of our perfect-fitting patterns is obtainable for every design illustrated. Don't delay! Send for your copy to-day!

Join the "Back to Ogden's" Movement

Sikorsky Flying Boat

British Firm Secure Manufacturing Rights For Aircraft

British Aircraft Ltd., has acquired manufacturing license rights to the Sikorsky clipper flying boat, officials of the United Aircraft Corporation report.

Beyond affirming that the deal had been made with the Manchester, England, firm, United officials declined to give information about the negotiation between British Aircraft and the Sikorsky Aviation Corporation, of Bridgeport, Conn., which is a United member.

United officials did not comment upon a report that the four-motored craft are desired for use in Australia. New Zealand mail, express and passenger service. Sir Charles Kingsford-Smith, trans-oceanic flyer, was in Bridgeport recently during tests of the latest clipper ship. His presence there lent strength to the report of the Australian-New Zealand venture.

Contribute Food For Troops

Women Of Ethiopia Give According To Their Means

Patriotic women of Ethiopia, rich and poor alike, are prepared to contribute to the defenses of their country by supplying provisions to the troops.

The women's patriotic society has adopted a resolution declaring, "we are hereby willing to destroy us and take our wealth, let us prepare for the soldiers eager to defend our freedom what they need; for each soldier three kunnas (about half a bushel) of powdered bread; three of barley flour, one of cubed bread fried in oil and one kubbaya (one and one-half) of pepper, one of salt, one of bean flour, one of butter and one of coffee beans. Each must give according to the limit of her means."

A Real Air Hero

Navigator Of Jubilee Mail "Plane Awarded Air Cross

In recognition of his gallantry while flying with Sir Charles Kingsford-Smith recently P. G. Taylor has been awarded the Air Cross. Taylor was navigator of the plane which Sir Charles was piloting between Australia and New Zealand with a load of Jubilee mails when engine trouble developed over the Tasman Sea. For a time it seemed as if the plane must crash, but Taylor volunteered to go out along the wing and transfer oil from an engine which had gone out of action to another engine which was showing signs of trouble. Time after time he crawled along an oil-smear strut to the engines and transferred oil in a flask, enabling the engine to hold out and the plane to land at Sydney.

Takes Time Far Tea

John Bull may complain that he is one of the most heavily taxed men in the world to-day, but certainly he is not one of the hardest worked. An expert construction foreman, who recently returned to England after spending a number of years in Canada, writes:

"This is a terrible country to work in. We stop work at 10 a.m. and again at 3 p.m. and get a cup of tea. They certainly don't know what hard work is."

A century ago, before the automobile was even thought of, the State of Michigan multiplied its population seven times in the decade from 1830 to 1840.

British Naval Program

Calling For Bids For Twenty-One Fighting Ships

Great Britain began calling for bids on 21 ships embraced by her 1935 naval building program.

Ten million pounds sterling (\$50,000,000) will be required for the 1935 construction program, it was estimated. "This program falls within the limitations of the Washington naval treaty and is designed to replace over-aged ships. The new ships will include three cruisers, nine destroyers, three submarines, one submarine depot ship, four sloops, one survey ship, and several smaller vessels."

Work on this program was expected to be spread over about three years. Some of the fighting vessels will be built by the royal dockyards, and the construction probably will be in full swing by next spring.

Communication Boards

Japanese Railway Has New Idea For Helping Passengers

A new idea in railway comfort adopted in Japan would afford greatly to our travel if it were adopted in this country. In every station blackboards are provided on which an inscription states: "Passengers desiring to communicate with friends expected later are invited to write messages." Here are some of the messages: "I waited half an hour, then took the 10:50 to Kyoto." "Can't go to-day; please don't be angry." "Have gone to restaurant, second floor." Evidently, trouble is suggested by this note: "My husband returned. Come next week."

Easy To Be Safe

Explorer Finds Cannibals Will Not Eat Man Who Smokes

Safety measures are being taken by an explorer against being eaten by cannibals. "Cannibals won't eat people who smoke—they think it impairs their flavor," declared Dr. Edgar de la Rue, French geologist, on landing in New York from France on his way to the Camal Islands of the New Hebrides. Dr. de la Rue said that he found it a wise precaution to take plenty of tobacco with him on his visits to the islands. He goes there for the purpose of making a survey for the Natural History Museum of France.

Squirrel Put Out Lights

Seven villages in Madison and Onondaga counties, New York, used lanterns and candles for nearly five hours all because a grey squirrel clung to a grounded part of a power pole and stuck its nose against a wire. One of the wires was burned through.

LAME BACK

Gin Pills give prompt relief from backache resulting from deranged kidneys. They soothe and heal irritated tissues and assist the kidneys in their function of eliminating poisonous waste matter from the system.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons — instead of their doctors — on remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia" — the safe remedy for your child.

Remember this — And Always Say "Phillips' When You Buy." Your child deserves it; for your own peace of mind, see that you get it — Genuine Phillips' Milk of Magnesia.

Also in Tablet Form

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores. They are the equivalent of a teaspoonful of the liquid form of Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia
MADE IN CANADA

MISS ALADDIN

"One Wide River To Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he has, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been killed. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthew's uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a bus full of school children, which was stalled across the road with its back wheels resting in a snow-filled gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard.

Now Go On With The Story

CHAPTER XVIII.—Continued

Tom Osgood, stripped to his overalls and cotton shirt, was putting his clothes on the boy who had given up

young MOTHERS

Take no chances. Children's colds are best treated without "dosing." At bedtime, just rub on VICKS VapoRub.

PROVED BY 2 GENERATIONS

Jack's coat. Without Tom's help, Nancy told herself, she could not endure much longer. That boy was a hero! How many times had she seen him, when on the brink of dozing, pull himself together valiantly to help the younger ones. Why, he was drowsy now, poor darling! His task accomplished, he had slumped onto that huddled mass upon the floor. Oh, he mustn't go under! Not brave little Tom Osgood! Nancy dragged herself up, shaking the boy with all her falling strength.

"Wake up, Tommy! I need you! We must help these children. Don't go to sleep, Tom. . . . Keep fighting . . . fighting . . ."

An hour later when the bus door snapped opened and Matthew Adams, his uncle, and two grim-faced fathers stepped fearfully inside, Nancy's fur coat was covering a mound of children, while the girl herself, almost too spent to realize that help had come, sat on the floor amid a drift of snow with only a child's thin sweater covering her thin silk underwear, nodding, nodding, as the men rubbed mechanically at a small boy's frozen feet.

CHAPTER XIX.

Such events are "pew's to the Associated Press. On the morning after that momentous blizzard James Nelson arose early, for Margaret was convalescing from an attack of flu, and the woman who had been coming in to help was also ill. Hence it devolved on Dad to get the family breakfast; but before beginning this unaccustomed duty he stopped to take in his morning paper.

Spring had come early to Edgemere. The air, James noticed, was almost balmy. He had a melodious whistle, and Mendelssohn's "Spring Song" was on his lips when, suddenly realizing that time was fleeting, he turned toward the kitchen.

"Hello, there!" greeted Phil on his way downstairs; and smiling, James tossed him the paper without looking at it.

"Take that up to your mother, Phil. She may like to glance at the news before I go. But come right back, sonny. I need a cook's assistant. And ask how much coffee I ought to use."

Margaret looked up happily as the boy entered her room.

"It's good to hear Dad's whistle," she said, recalling the long months when that cheerful sound was silenced. "I feel like a slacker lying here while he turns cook; but the doctor says I'm not to stir for another week. Thank goodness Aunt Louise will be out to-night! Don't stop to read the paper, Phil; and tell your father a helping teaspoon—"

"Look here!" The small boy's eyes were bright with interest. "There's been a awful blizzard in Colorado! I wonder if it was near Cousin Columbine's."

Margaret reached for the paper, continuing almost automatically: "A heaping tablespoonful to every cup, Phil. Then as he ran to join his father, her eyes fell on these arresting headlines:

"TERRIFIC BLIZZARD SWEEPS COLORADO PLAINS. BUS FULL OF SCHOOL CHILDREN SAVED BY TWO YOUNG PEOPLE AFTER THE DRIVER, GOING IN SEARCH OF HELP, BECAME CONFUSED AND DIED IN THE STORM."

"Denver, Colo., March 27th. (AP) A story of heroism and self-sacrifice was enacted yesterday afternoon in a school bus stalled on the Colorado prairies, when Nancy Nelson, nineteen, popular sub-deb, daughter of Matthew Adams, and Jack Nelson, of Boston and cousin of Miss Columbine Nelson, pioneer resident of Pine Ridge, Colorado, stripped to their underwear in order to put her clothes on children who were freezing to death before her eyes; while her brother Jack, seventeen, felled the storm in hope of bringing help, succeeded in reaching a distant ranch where he collapsed after giving news of the whereabouts of the missing bus. Without the heroic action of these two young people, sixteen children would undoubtedly have perished. Frantic parents."

Margaret read no further because her hands were shaking so that she could not see the type; but she managed to call a call that somehow startled her husband, and at that very moment the front door bell rang.

John set the coffee pot on the stove, and said: "You answer that bell, son. I'll see what Mother wants."

Margaret was lying back against the pillows, her face colorless. One hand still clutched the paper, and a limp gesture told her husband he was to read it. He sat on the bed, and, strangely, his daughters' name stared up at him as he took the sheet, even before he saw the headlines.

" . . . Nancy Nelson . . . stripped to her underwear . . . brother Jack . . . collapsed . . ."

"It's a telegram!" cried Phil, bursting into the room in great excitement. "Maybe it's from Cousin Columbine asking me to visit her."

Open it quick, won't you? Why—what's the matter? Is Mother sick again? Gee! there's the telephone. What'd it have to ring for now?"

As he sped away, his father stared down at the yellow envelope. For a moment it seemed as if he could not draw its contents. Then, bracing himself inwardly, he tore it open, eyes seeking the signature before he read: DON'T BE UNDULY ALARMED BY REPORTS IN PAPERS STOP BOTH WILL HAVE BEST OF CARE AT HOSPITAL STOP JACK MAKING GOOD FIGHT AGAINST PNEUMONIA AND ALL POSSIBLE BEING DONE STOP TELEGRAPH IF COMING STOP WILL WIRE AGAIN AT NOON AFTER TALKING WITH DOCTOR STOP AM PROUD OF OUR CHILDREN COLUMBINE NELSON.

Margaret, watching his tense face, cried out: "Is—is it—" "Not that!" James broke in quickly. "Not that, dear!" and read the message, his voice trembling. Then the small boy was back, calling as he ran up the stairs: "Is Aunt Lou on the telephone. She wants you, Dad. Where's that telegram? Was it—"

When James returned five minutes later there was a bit more color in Margaret's face, and Phil, avidly perusing the story, lifted his head from the newspaper to exclaim: "Gee, Daddy! Jack wasn't wearing any socks! He'd put 'em on a little feller that was freezing. And Nance had given her stockings to some one, and her dress'n her fur coat and everything. She had one o' the kid's sweaters over her slip. She got unconscious soon as they found 'em. One o' the Adam fellows got there first. They'd been to his uncle's ranch and got caught in the blizzard on the way home and collided with that bus. It says they showed un-believable heroism; and the driver was found a mile off the road under a snowdrift. Nancy's legs are frozen to—"

He ceased abruptly at a warning glance from his father. "That's enough now, Phil. Louise had seen the paper, Margaret, and was rather worked up—for Louise. Another teacher will take her classes and she'll catch an early train out here. I'll stay until she comes, dear. She asked if we were going to Colorado, but—"

"I—I feel as if I must, Jim," said Margaret weakly. "If Jack has pneumonia he—he's grown so fast that—"

"The last letter said he'd gained twelve pounds," the little boy reminded her, "and Nancy said he'd never looked so husky."

"I know, but . . ."

Her lips trembled, and James interrupted: "I understand how you feel, Margaret; but it's impossible for you to travel now. This flu's so treacherous if one gets up too soon. But I'll drop everything and go myself under the next telegram is reassuring. I promise that."

"Is pneumonia a very bad thing to have?" questioned Phil soberly.

"Pretty bad," Dad answered, thinking that should Jack not weather it his mother could scarcely reach him in any case. "Now close your eyes, Margaret, and I'll bring some coffee. You'll feel stronger when you've had something to eat."

Louise Nelson said afterwards that she spent that entire day answering telephone and door bells. The news spread fast; and friends and neighbors responded anxiously. A number of Nancy's schoolmates called up from town, as well as some of the far-famed "boy friends." There were calls from Exeter asking if Jack was as badly off as the papers intimated; and it seemed to the distressed woman that she had no time in which to cheer the invalid.

Cousin Columbine was better than her word, the second message arriving almost an hour before promised. Louise called her brother's office and read it to him.

"It's addressed to you, Jim. She says: 'Doctor, thinks things look rather better, and considering how far away you are, advises you not to start immediately. Jack doing as well as can be expected. Nancy suffering greatly but her courage is good and will increase as weakness wears away. Letter follows this, but will write and wire daily for the present. Shall stay near Clockwork Hospital so address me there.'"

"Then Dad won't go?" asked Phil, hovering near as his aunt telephoned. She shook her head.

"Are they both better?" Aunt Louise nodded because speech came hard. The message was hopeful yet she seemed to read something between the lines. Pneumonia, she thought, sometimes travels faster than a railroad train. Was that why the doctor advised Jack's parents not to come?

(To Be Continued)

Indian doctors of Brazil use ants to sew up wounds; the wound is held together while the ant bites into the flesh. The insect is then beheaded, but the jaws do not release their hold.

I FLEW OFF THE HANDLE AT STOPPED-UP DRAINS

UNTIL I USED

It cuts right through all clogging matter . . .

There's nothing like Gillett's Pure Flake Lye to clear drains in a jiffy! Use it regularly and you'll keep sinks, tubs and toilets running freely. Pour it down full strength

—it will not harm enamel or plumbing. Kills germs and destroys odors as it cleans. Keep a tin on hand for emergencies. • Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet gives dozens of practical hints for using this powerful cleanser and disinfectant. Also gives full directions for soapmaking, thorough cleaning and other uses on the farm. Write for free copy to Standard Brands Limited, Fraser Ave., and Liberty St., Toronto, Ontario.

Odd Jobs In Hollywood

One Man Makes All The Cobwebs For Spooky Films

In the Hollywood studio is a man who has worked 10 years—and he has yet to see a film star. He works at night. Every night he files and sharpens the teeth of 200 saws for the army of carpenters using them the next day. He is only one of the many odd jobs that go to the making of a picture. There is the "cobweb spinner," for example. He makes cobwebs for those "spooky" films they turn out in Hollywood every now and then. He spins them out of a chemical mixture that is formed into gossamer strands by a strange electrical machine. When a glass is to be shot from an actor's hand or a rope to be snipped by a bullet they call in Tex Driscoll, who has been doing this sort of thing for more than 10 years, and who has never missed yet. Perhaps the strangest job is that of Herman Frommel. He has to listen to music. Being the copyright expert, he can tell who wrote any few bars and where it comes from. That prevents the studio lifting music for which they might be asked to pay an exorbitant sum later.

Sapphire Is Favorite

Selected As Betrothal Stone By Brides Of King's Sons

The brides of sons of the King and Queen have been at one in their choice of betrothal stones, says the Glasgow Herald. Lady Elizabeth Bowes-Lyon set the example, which was followed a year ago by Princess Marina of Greece, and has been copied now by Lady Alice Scott. No stone is as beautiful as the true blue sapphire, especially when its lights are enhanced by diamond setting. The Princess Royal selected an emerald engagement ring, probably because so many sapphire stones were included in the Glancianic jewels, which were a wedding present from her bridegroom.

Prize For Short Story

Imperial Order Daughters of the Empire has announced a prize of \$50, offered by Echoes, the official magazine, in a short story competition. British residents in Canada may submit stories before Feb. 1 of 2,000 to 5,000 words, preferably dealing with Canadian life.

Some men overwork themselves trying to live without work.

Should Apply To Motorist

Refraining From Conversation With Driver Might Prevent Accidents

Don't talk to the driver! Why should the familiar order apply only to the motorist? He at least has rails to hold him in the line of duty. The motorist has only a steering wheel.

Who can hold the car strictly to the straight and narrow with somebody jabbering into his ear? How can he concentrate with a shrill voice yelling at every curve, "Look!"

The front seat driver is accused of many crimes and misdemeanors, of some of which he is not guilty. The back seat one is participates criminally. But the man at the wheel gets the devastating headline and the plaintiff attorney's scathing remarks to the jury.

"Don't talk to the driver!" ought to be hung over every motorist's head. And to it should be added: "Don't let the driver talk to you!"

The place for a driver's tongue is in his cheek. The place for his hand is on the wheel, and not pointing out the pictures. And the place for his mind and eye is on the ribbon of concrete unrolling ahead.—Los Angeles Times.

Homage To Canada's Dead

Earl Of Bessborough Places Wreath In Peace Tower

Homage to Canada's dead in the Great War was paid by the Earl of Bessborough as one of his last official acts before he left this country. Accompanied by his staff, His Excellency proceeded to the memorial chamber in the Peace Tower at Ottawa, and there deposited a wreath of maple leaves and poppies on the Altar of Remembrance. Following the ceremony the Governor-General was presented with a document which voiced the Legion's appreciation of the interest manifested by His Excellency in co-service men's problems throughout his regime in Canada.

Only two of every 1,000 persons reported missing in England are never heard of again.

Little Helps For This Week

Let not him that girdeth on his harness boast himself as he that putteth it off. 1 Kings, 20:2.

Was I not girded for the battle-field? Bore I not helm of pride and glittering sword? Behold the fragments of my broken shield, And lend to me Thy heavenly armor, Lord.

Oh, be at least able to say in that day—Lord I am no hero. I have been careless, cowardly, sometimes all but mutinous. Punishment I have deserved. I deny it not. I was a traitor and deserter I have never been. I have tried to fight on Thy side in Thy battle against evil. I have tried to do the duty that lay nearest me, and to leave whatever Thou didst commit to my charge a little better than when I found it. I have not been good, but I have at least tried to be good. Take the will for the deed dear Lord. Strike not my unworthy name off the roll-roll of the noble and victorious army which is the blessed company of all faithful people, and let me too be found written in the Book of Life, even though I stand the lowest and last on the list.

A Robot Lighthouse

Automatic Lamp And Fog Siren Protect Perilous Spot

A remarkable robot lighthouse which has almost human reactions was recently put into service on the dangerous Nivivik Rock, near Umanak. It is electrically operated and the Breton peasants have nicknamed it "Monsieur Nivivik," so impressed are they by its power. The giant, lamp of the lighthouse is of 2,000,000 candle-power, the power being laid on from the mainland. It automatically goes into action when darkness falls. Even if the power cable is broken, an acetylene lamp will automatically take over. A huge siren switches itself on in foggy weather. The Nivivik Rock is situated in such a perilous spot that an ordinary lighthouse with a keeper is impracticable. Boats can only reach it once or twice a year.

DISTRICT AGRICULTURIST,
HANNA, ALTA

Farmers are reminded of the necessity of cultivating stubble land for the purpose of destroying grasshopper eggs. This should be done as soon as the land is cleared of stooks, as the longer the eggs are exposed before freezeup, the greater the damage to them. Neglect of this precaution if simply an invitation to another grasshopper outbreak on your farm next year. It is becoming increasingly apparent that even where poisoning has been persistently carried out that the scattering of grasshoppers which remain may, under favorable conditions, lay sufficient eggs to produce a very large crop of hoppers next year, and the

grasshoppers which remained to lay eggs this fall amounted to much more than a scattering throughout this territory. Destroying these eggs in the stubble land now is far easier cheaper, and more sensible than leaving the entire battle until next summer, and having to fight hordes of hoppers by poison.

Also it is an imposition upon Government and Municipal authorities to expect large quantities of hopper bait year after year, where the situation can be largely controlled without this expenditure.

United Church Meeting

A Congregational meeting was held last Thursday evening in the United Church with about twenty present. Miss Mae Todd was elected Secretary of the meeting.

On the motion of Mr. Youell the following were elected to the church Board: Mrs. L. Cooley, Mrs. Willigan, Messrs. Rideout, Chapman and Meers with Mr. Youell as Sec-Treas.

Rev. Mr. Smylie gave an outline of the work in the field. Several hymns were sung and the meeting closed with prayer. During the evening part of the C. G. I. T. group rendered two songs very tunelessly and Mrs. Rideout and Mrs. Cooley gave recitations. A delicious lunch was served at the close of the meeting.

CYRIL A. COUGHLIN
Barister-at-law, Hanna, is the Liberal-Conservative nominee in the Acadia Federal Riding. Mr. Coughlin has resided in the Town of Hanna for the past twenty years and is thoroughly conversant with the farmers' problems from all angles. In his addresses throughout the riding he has developed into one of the greatest boosters for the Bennett programme. The Canadian Grain Board, The Farmers Creditors' Arrangement Act, The Natural Products Marketing Act and The Prairie Farms Rehabilitation Act having been the themes of many of his addresses.

THE ADVANCE
WEATHER BULLETIN

Week of October 7 to 13, 1935

Fri, Oct 11—Slow moving disturbance, with light precipitation, drifts across from the west and northwest as temperatures moderate in nearly all sections.

Sat, Oct 12—Weather now turns colder about the west and northwest, but remains fairly moderate with some unsettled conditions around central and southeast sections.

Sun, Oct 13—Changes to clearing weather in most sections and becoming considerably colder, though about far northwest unsettled conditions come on, carrying light precipitation.

Week of October 7 to 13, 1935, in central provinces begins with weather turning colder and becoming unsettled with mild storm condition coming on from the west, carrying light scattering precipitation and is the forerunner of a cold wave which is expected to sweep through the country after mid week and then before end of week turn to much more moderate weather and again unsettled, after a short period of clearing. Just at last of week temperatures decline, though about the west somewhat unsettled and moderating.

In October a cold wave in this country usually means freezing weather, or at least a close approach to the frost line, and this week's forecast indicates a cold period of a few days, central near the 8th in west or about the 9th in eastern sections. However, on account of disturbed conditions traversing the central provinces during the week there should be some snow, or cold rain, and this would tend to moderate the cold winds from the north and west. About the basins the C. G. I. T. and Acadia riding the permanent frosts of the winter do not often set in until after the middle of October, this year probably coming on with no cold spell near the temperature. Warm. Mild. Cold.

Fri 11
Sat 12
Sun 13
This is for the northwest regions; maxima and minima occur one day later about central regions; 2 days later near the great lakes and 3 days later on Atlantic coast.

PREMIER BENNETT'S WHEAT POLICY

The surge of energy and enthusiasm with which Premier R. B. Bennett has undertaken the political campaign on behalf of the Conservative Party must win approbation and applause even in the camp of his adversaries. A few months ago there were not many people in Canada who would wager the smallest sum on the Conservatives to be re-elected. But the dynamic manner in which the Conservative chieftain has developed his campaign, together with the loss of prestige incurred by Liberalism in Western Canada, has changed matters considerably.

Premier Bennett is a man of outstanding ability and high courage. The chief resentment against him lies in the somewhat extravagant promises he made in 1930, many of which could not be fulfilled. But Mr. Bennett has plausible explanations for this lack of fulfillment and what he has accomplished is quite substantial.

Possibly the most notable achievement of Mr. Bennett is his handling of the wheat situation. A man of his wide knowledge and experience must have known that he was tampering with dynamite when he undertook with the assistance of John I. McFarland to interfere with wheat marketing in Canada. The Social Credit people may talk about the might of the money power throughout the world, but the enormous wealth, power and influence of the international grain trade is not second even to the international money power.

Premier Bennett and his lieutenant, John I. McFarland, have waged a heroic fight for the wheat farmers of Western Canada against an array of seemingly impregnable forces. It is doubtful if the true story will ever be told, as evidence and secret trails can be carefully hidden. But, as Mr. Bennett stated, John I. McFarland ruined his health and shortened his life in the fight, and the premier's already heavy burden was added to very materially.

It now seems that Mr. Bennett's wheat policy may turn out fairly satisfactorily. Unforeseen calamities of nature appear to have turned the tide in his favor and rather confused the mighty opposition. If this is true it will certainly be a good thing for Canada and a creditable achievement for the premier.

The Hanna Herald is not a political paper but we have admiration for the high courage, statesmanship and great ability of the present premier of Canada and thus have not the slightest hesitation in paying this small tribute.

CROP TESTING PLAN

Over 20,000 farmers' fields of wheat have been tested under the above plan during this past month. Some 6,000 samples graded "A," indicating they were sufficiently true-to-variety to be used for seed. Any National Elevator Agent will supply the names of those farmers in your district whose samples graded "A."
